Relatório

Título projeto:

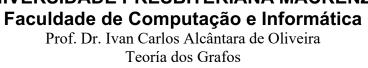

Criação de grafo das distâncias entre as refinarias e postos do estado de SP

Objetivo ods: Este projeto faz parte do Objetivo 7: Energia Limpa e Acessível: Analisar a distribuição geográfica das refinarias e postos de combustível pode ajudar a entender como o acesso a fontes de energia, como gasolina, diesel e etanol, está distribuído na cidade e se é acessível para todos os residentes.

Compilações do programa

Menu de opções:

- a) Ler dados do arquivo grafo.txt
- b) Gravar dados no arquivo grafo.txt
- c) Inserir vértice
- d) Inserir aresta
- e) Remover vértice
- f) Remover aresta
- g) Mostrar conteúdo do arquivo
- h) Mostrar grafo
- i) Apresentar a conexidade do grafo
- j) Encerrar a aplicação

Escolha uma opção:

Grafo lido do arquivo grafo.txt.

Prof. Dr. Ivan Carlos Alcântara de Oliveira Teoría dos Grafos

Grafo Reduzido: No código que estamos utilizando, o tipo de redução de grafo realizado é a contração de vértices. Na contração de vértices, os vértices que estão conectados por uma aresta no grafo original são combinados em um único vértice no grafo reduzido. Isso reduz o número de vértices no grafo e simplifica sua estrutura, mas mantém a conectividade entre os vértices. 1 -> 5 : 1.5 1 -> 6 : 2.5 1 -> 8 : 1.8 1 -> 9 : 5.2 1 -> 11 : 22.9 1 -> 12 : 28.6 1 -> 13 : 22.5 1 -> 14 : 29.9 1 -> 15 : 26.0 1 -> 16 : 22.0 1 -> 17 : 23.0 1 -> 18 : 19.8 1 -> 19 : 19.5 1 -> 20 : 24.8 1 -> 21 : 22.0 1 -> 22 : 29.3 1 -> 23 : 26.3 1 -> 25 : 65.6 1 -> 26 : 64.1 1 -> 27 : 64.9

Prof. Dr. Ivan Carlos Alcântara de Oliveira Teoría dos Grafos

Menu de opções:
a) Ler dados do arquivo grafo.txt
b) Gravar dados no arquivo grafo.txt
c) Inserir vértice
d) Inserir aresta
e) Remover vértice
f) Remover aresta
g) Mostrar conteúdo do arquivo
h) Mostrar grafo
i) Apresentar a conexidade do grafo
j) Encerrar a aplicação
Escolha uma opção:
Aplicação encerrada.

Obs: Por ter uma compilação muito grande das opções, colocamos umas partes da compilação para o relatório não ficar muito grande e poluído.
